

The Right to Paid Family Leave

Child care costs provide no shelter, nor do the cowering backs of a generation of legislators.

The Time has come for the United States to join the growing calls of 85% of countries worldwide and mandate equal access to Paid Family Leave for all mothers, giving the blameless child the healthy beginning they deserve.

It is of universal benefit that the unnecessary anxiety of unpaid family leave be permanently removed from the American Mother's conscience.

Through conjoint payment between employer and employee, at least 8 weeks of Paid Family Leave has surpassed plausible to proven.

Unpaid leave is unrealistic.

And still today, as new mothers bond and rest, they ponder: "Better to work? Or better to stay home? How can no income be best for the baby??"

It is common knowledge that early and emotionally-responsive parenting is critical across one's entire life span. Interference with early development is of zero benefit to anyone.

It is the Altruist's Party's effort to prompt swift legislative action in defense and righteous regard for every Mother and Child, thus protecting the maternal health and American child's ongoing development from their very foundation.
